

**MATH. 6343. SEC. 001, LIE THEORY II, SPRING 2020
TTH 9:00-10:15, 1105 PHSC**

Instructor: Tomasz Przebinda, Room 524, PHSC; home page: tomasz.przebinda.com; tprzebinda@gmail.com; tel: 325-0830

Office hours: Tuesday 2:30-1:30, Friday 2:30-3:30.

Text: We shall use books and other materials which I'm going to provide to you for free.

Exams: There will be no midterm exams.

Homework: There will be weekly assignments, to be handed in on Thursday at the beginning of the class. Please hand in your homework on time; late assignments cannot be accepted.

Final grade: final project 30% + homework 70%

Students with Disabilities: Any student having a disability that may interfere with the demonstration of his or her abilities should contact me as soon as possible to arrange accommodations necessary to ensure full participation in the course.

Grade of Incomplete: The grade of "I" is a special-purpose grade given when a specific task needs to be completed to finish the course work. This is typically a term paper or other special assignment, so rarely makes sense in a mathematics course. An "I" cannot be given to avoid a low grade in cases where the course work is not strong.
